

ALLERGENS:

Marble Slab does not have an allergen free environment. Some Marble Slab products contain ingredients associated with common food allergens. The FDA has come up with the "Big 8" allergens as: eggs, milk, peanuts, soybean, tree nuts, wheat, fish and shellfish. (In Canada: must include Sulfites and Sesame Seeds). While this list does not include every allergen causing allergies for every individual, of course, these are the ones that we as manufactures are due to report. These are the top food allergens recommended by the FDA. The following flavors at Marble Slab Creamery contain known allergens. This list is intended to act as a guide when making flavor choices upon your visit to ensure a delicious experience.
